Antares Rockets:

Antares is an expendable launch system developed by Orbital Sciences Corporation (OSC).The main purpose of this rocket is to launch the Cygnus spacecraft to the International Space Station as a part of NASA's COTS and CRS programs. Antares is the largest rocket operated by orbital ATK.NASA awarded Orbital a Commercial Orbital Transportation Services. This rocket also provides cargo to the International Space Station. The height of this rocket is around 40.5m with a diameter of 3.9m.The minimum mass of this rocket is 2, 82,000kg. It has 2 to 3 stages for its launch. Its payload to LEO is 8,000kg.

S.no.	Year	No. of Rockets	Launch Outcome
.1	2013	2	Success
.2	2014	3,1	Success, Failure
.3	2015	N.A	N.A
.4	2016	1	Success
.5	2017	1	Success
.6	2018	2	Success
.7	2019	1	Success
